ThinkHub™

IDEATE. COLLABORATE. INNOVATE.

ThinkHub is a collaboration tool designed to help you ideate, collaborate, and innovate. By consolidating all the moving pieces of a brainstorming session, ThinkHub works with the same devices, content and software that you already use - meaning almost zero set-up time to initiate ThinkHub Sessions, and more efficient and productive meetings with your peers.

FEATURES + BENEFITS

1 CANVAS
The ThinkHub Canvas is the digital backdrop for your ThinkHub Sessions, and can expand up to 20 times the surface area of the physical touchscreen. Use touch gestures to navigate the Canvas. Enjoy the ability to write directly on the Canvas, and pinch-zoom to visualize process flows or connect different ideas in your Session.

2 CANVAS KEY
The Canvas Key is located in the upper left corner of your ThinkHub Canvas. In addition to using the Canvas Key as your visual aid, you can tap directly on the Canvas Key to quickly navigate to areas of the Canvas.

3 DYNAMIC MENU
Tap and hold anywhere on the Canvas to unlock your user tools. Open any of our built-in apps (Note, Sketch, Web Browser), draw directly on the Canvas, undo actions on the Canvas, and Save/Open/Email/Print your ThinkHub Sessions.

4 WEB BROWSER
The ThinkHub Web Browser is optimized for multitouch, multiuser group use. Drag and drop the Web Browser onto the Canvas to move, pinch-zoom, and annotate web-based content.

5 NOTES
Notes can be color-coded to help categorize or label certain groups of content. Use Notes to jot down quick ideas. Access Notes anytime from the Built-in App Tray, or via the dynamic Menu.

6 SKETCH
Open a Sketch to create a quick drawing on the ThinkHub Canvas. Use the built-in annotation tools to select different pen weights, colors, take snapshots, and more. Access Sketches anytime from the Built-in App Tray or via the Dynamic Menu.

7 DEVICE TRAY
All connected devices will appear in the Device Tray. Each device will display as a preview thumbnail until you tap or drag the thumbnail to share to the Canvas. At the base of the preview thumbnail, the name of the device displays as overlay text for additional reference.

8 AUTOPRESENT MODE
Toggle 'Auto On / Auto Off' to automatically display device screens to the Canvas when connected. When AutoPresent Mode is on, anyone who connects their device to the Canvas will automatically be displayed in full-screen mode.

9 THINKHUB HELP
Anytime you need a refresher on your ThinkHub tools, you can access ThinkHub Help by tapping the question mark icon located in the center of the bottom tray of the ThinkHub Canvas.

10 MEDIA TRAY
All media files live within the Media Tray. This includes images, videos, and PDFs. To load your files to the Media Tray, simply plug in a USB drive to your ThinkHub USB port. Once you've plugged in your USB drive, your content will automatically load into the Media Tray with thumbnail preview windows. To share the content to the Canvas, simply tap or drag file thumbnails.

11 T1V AIRCONNECT APP
T1V AirConnect enables you to connect any laptop or mobile device wirelessly to the ThinkHub Canvas. T1V AirConnect supports Mac OS, iOS, Linux, Android, and Windows. Once you have installed AirConnect on your device, you will be prompted for your AirConnect Key or IP Address. You can reference the top right corner of the ThinkHub Canvas for this information.

CORPORATE OFFICES + CONFERENCE ROOMS

ThinkHub is the perfect vehicle to present and collaborate on marketing materials, sales reports, product development schedules and specifications...you name it. Presentations can reach new heights as the presenter can scroll through their presentation and make annotations per their audience's feedback in real time, then email directly from the device. Brainstorming sessions allow everyone in the room to view the same content at once, while also sharing ideas to the screen - images, videos, web pages, documents, and presentations. ThinkHub can also transform the screen into a web conference - just share a device to the ThinkHub Canvas and the whole room will be able to view the callers on the other side of the connection to facilitate virtual meeting rooms.

CREATIVE AGENCIES + DESIGN STUDIOS

With ThinkHub, creative and design studios can craft visual mood boards to inspire their next project. Whether working alone on a first concept or finalizing a pitch for the client, work can continuously evolve without losing track of past edits, and can be saved as is to pick back up at a later session. No matter the file type - be it CAD drawings or building a visual identity with color samples, ThinkHub allows you to view everything in one location, where you can map and group ideas or themes, write notes directly on the Canvas, or label your content with color-coded notes. If working with video, our annotation tools allow you to freeze the video, annotate the frame, snap a picture, and share with your team - making the editing process faster than ever.

SOLUTIONS IN EVERY SIZE

ThinkHub software runs on a variety display sizes. Whether you're working with single panel or multipanel walls, or want to run ThinkHub on an interactive table, ThinkHub solutions are highly flexible and can be seamlessly integrated with your space. Enjoy the option to work with T1V Interactive all-in-one solutions, one of our partners, or purchase the standalone software to run on qualified touchscreen technology.
